

## Immediate Emergency Response

**Call 24-hours: 770-232-9797**

**Partners Risk Services** has performed the due diligence necessary to find the most qualified, capable service provider for our customers' emergency mitigation service needs. Remember, GA state law allows insureds to utilize a contractor of their choice... not just the one selected by the insurance carrier.

**Full Circle Restoration** is one of Atlanta's most experienced first response, disaster recovery/CAT, restoration and reconstruction companies specializing in insurance claims and serving the commercial, industrial, institutional & residential property segments through building owners, real estate and property management companies and the insurance industry for over two decades.

**NOTE:** Any charges generated for work performed by Full Circle Restoration will be the responsibility of the client if it is determined that there is no insurance coverage in place for the loss. Only your insurance company adjuster can determine coverage for a property damage claim. Contact Partners Risk Services or your insurance company to file your claim.
